*R.A.C.E. Mentoring Through Social Media* Donna Y. Ford 2016-12-01 The Ivory Tower is and can often be a lonely place for faculty of color. Social injustices run deep and are entrenched within academia. Faculty of color (FOC), more specifically Black and Hispanic, often lament about the 'Black/Brown' tax that frequently takes its toll both personally and professionally, and pushes them out of the academy. Similar to trends in P?12 settings, educators of color in postsecondary contexts represent less than 10% of the profession. In essence, we are an anomaly and the implications of this are clear and dire, as evidenced by persistent achievement, access, and expectation gaps within the academy. Scholars of color (SOC), at all stages, but particularly during doctoral training, frequently struggle to not just survive, but to thrive, in the academy. Too many fail to earn their doctoral degree, with many wearing the All But Dissertation (ABD) as a badge of honor. Although ABD is not a degree, many scholars of color receive inadequate mentoring, often substandard in comparison to the hand?holding White students receive, which leaves far too many doctoral students of color lost, bewildered, angry, indignant, and defeated. This righteous indignation is justified, but excused away using the myth of meritocracy and colorblind notions of success; followed by a myriad of problems steeped with victim blaming, as noted in the classic *Presumed Incompetent: The Intersections of Race and Class for Women in Academia* (Gutiérrez y Muhs, Niemann, González, & Harris, 2012). The aforementioned work was not the first treatise on higher education and how the non?status quo, along with those grappling with oppression and double standards, experience the profession called higher education. Moreover, *The Chilly Climate* (Sandler, Silverberg, & Hall, 1996) report, which focused on females, was also telling, but not enough was addressed and disclosed about females of color, until version two. But these issues do not stop with females of color, but instead, extend to all faculty of color. R.A.C.E. Mentoring, a social media Facebook group, with several subgroups (see Figures 1 and 2) was created by Donna Y. Ford, Michelle Trotman Scott, and Malik S. Henfield in 2013, to tackle the numerous thorny and contentious issues and challenges in higher education. We began by intentionally attending to the needs of students enrolled at mostly White universities, as well as those who attended historically Black colleges

and universities, while keeping the unique nuances and challenges of each setting in mind. We wanted scholars of color to thrive in both. Fondly and affectionately called RM, our charge and challenge is to affirm the dignity and worth of scholars of color. Additionally, we recognize that there are scholars outside of academe, and their contributions as well to impact and affect change for Black and Brown people inside and outside of academe need to be acknowledged. These scholars are community organizers, activists, P?12 teachers, and families. It truly takes a village...

Fantasmagoriana (Tales of the Dead) A.J. Day 2008-07 It was on a 'dark and stormy night', during the summer of 1816 that an eccentric group of English literati gathered at the Villa Diodati. The atmosphere at the Villa was charged by the violent streaks of lightening that licked at the mountain tops and split a black sky. As the wind outside whipped up the surface of lake Lemano into a cauldron of waves the occupants of the Villa; Lord Byron, Mary Shelley, Dr John Polidori, Percy Shelley and Claire Clairmont, whipped themselves into a gothic frenzy with recitals of haunting poetry and ghost stories. The stories that they read came from a book, originally written in German, that had recently been translated into French. The book that they read from was called *Fantasmagoriana*. *Fantasmagoriana* has a unique place in literary history. This is the first full translation of the stories that inspired Mary Shelley's *Frankenstein* and Dr John Polidori's *The Vampyre*.

Overcoming School Refusal Joanne Garfi 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

The Distribution of Prime Numbers Dimitris Koukoulopoulos 2020-07-28 Prime numbers have fascinated mathematicians since the time of Euclid. This book presents some of our best tools to capture the properties of these fundamental objects, beginning with the most basic notions of asymptotic estimates and arriving at the forefront of mathematical research. Detailed proofs of the recent spectacular advances on small and large gaps between primes are made accessible for the first time in textbook form. Some other highlights include an introduction to probabilistic methods, a detailed study of sieves, and elements of the theory of pretentious multiplicative functions leading to a proof of Linnik's theorem. Throughout, the emphasis has been placed on

explaining the main ideas rather than the most general results available. As a result, several methods are presented in terms of concrete examples that simplify technical details, and theorems are stated in a form that facilitates the understanding of their proof at the cost of sacrificing some generality. Each chapter concludes with numerous exercises of various levels of difficulty aimed to exemplify the material, as well as to expose the readers to more advanced topics and point them to further reading sources.

**Ageless** Suzanne Somers 2006-10-10 Can you really feel better as you get older? Is aging without illness possible? Is your own internal fountain of youth waiting to be discovered? Yes, yes, and YES! says Suzanne Somers, the bestselling author of *The Sexy Years*. It can all be true when you take advantage of the science of antiaging medicine—a revolutionary approach to achieving the ageless life. Suzanne Somers has already introduced millions of women to bioidentical hormone replacement therapy and changed the way we look at menopause. Now, in *Ageless*, Suzanne introduces an inspiring, medically validated approach to reversing the aging process and maintaining a healthy, vibrant, mentally sharp, sexually active life—while building the body's natural defenses against age-related diseases. Suzanne talks about:

- How antiaging medicine can help detox the body of harmful pollutants and chemicals and strengthen our weakest glands and organs
- The dangers of perimenopause and how women can treat it
- Why so many hysterectomies are unnecessary, how birth control pills may have contributed to the rise of hysterectomies, and how to restore your body to perfect hormonal balance after having one
- How andropause is a real condition for men, and how men can lose weight, regain their youthful physiques, and restore health, energy, and sexuality, all through bioidentical HRT
- The importance of sleep and the healing work that nature does during this time to balance hormones and increase energy

In this "antiaging bible," Suzanne brings together prominent, Western-trained antiaging doctors to show how the traditional medical approach is woefully inadequate. Its standard of care has been to treat all symptoms with drugs, but in *Ageless* you will find out how this approach does not make us better. With antiaging medicine you can heal your body rather than keep a chronic condition at bay with drugs. *Ageless* shows you how to keep your "insides" young, and how this manifests on the outside.

*Social Work in Europe* Charlotte Williams 2013-09-13 It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the *European Journal of Social Work*.

**Pwa90** Piers E. T. Al COLEMAN 2015-12-21 "In a remarkable career spanning more than six decades, Philip W. Anderson has made many fundamental contributions to physics. As codified in his oft-quoted phrase "More is Different", Anderson has been the most forceful and persuasive proponent of the radical, but now ubiquitous, viewpoint of emergent phenomena: truly fundamental concepts that can and do emerge from studies of Nature at each layer of complexity or energy scale. Anderson's ideas have also extended deeply into other areas of physics, including the Anderson-Higgs mechanism and the dynamics of pulsars. PWA90: A Lifetime of Emergence is a volume of original scientific essays and personal reminiscences of Philip W Anderson by experts in the field, that were presented as part of "PWA90: Emergent Frontiers of Condensed Matter" meeting held at Princeton in December 2013 to highlight Anderson's contributions to physics"--

Biologic markers—indicators that can tell us when environmental factors have caused a change at the cellular or biochemical level that might affect reproductive ability—are a promising tool for research aimed at answering that important question. *Biologic Markers in Reproductive Toxicology* examines the potential of these markers in environmental health studies; clarifies definitions, underlying concepts, and possible applications; and shows the benefits to be gained from their use in reproductive and neurodevelopmental research.

*Exotic Kondo Effects in Metals* D L Cox 2020-11-26 This provides a major review of the two-level system Kondo model, as applied to metallic glasses, nanoscale devices and some doped semiconductors; and the quadripolar and magnetic two-channel Kondo models developed for rare-earth and actinide ions with crystal splitting metals. These contrast with the simple single-channel model, and allow the study of non-Fermi liquid physics. This book forms a valuable and unique source of information for

statistical and condensed matter physicists and graduate students. Key Features: \* An invaluable and unique source of information on this highly popular area of condensed matter physics \* Based upon a special edition of the *Advances in Physics* journal \* Magnetic impurities in metals present a major challenge to condensed matter physicists, for which a strong starting point has long been the early insights of Kondo into the resistance medium
