Companion volume to our 6,000-word English-Haitian Dictionary. Contains over 57,000 Haitian words and expressions. "There is no surer way to negate a people than to valify that which represnets their very essence: Their language. To defile the Haitian language is to defule the Haitian people."

Textbook of Acute Trauma Care - Peter Lax 2022

This book provides a systemic approach to acute trauma care in line with the ABCDE paradigm and up-to-date information on assessing and managing major trauma from the pre-hospital to the rehabilitation phase. The book's early sections are dedicated to identifying and managing pathology caused by massive haemorrhage, airway, breathing, circulation or neurological trauma and examining the current evidence base relating to their management. The book then builds from fundamental skills to advanced interventions so that each level of responder can identify and implement aspects of clinical practice that will be of benefit to them at their stage. This approach also explains advanced interventions that may be executed subsequently, explaining how each phase of care sits together. This has a further benefit of producing seamless care for patients by practitioners of different levels using this book as a reference point. Later sections deal with specifics of in-hospital trauma care by specialty, including the explanation of decision making processes by specialties, use of diagnostic and interventional radiology, rehabilitation and psychological aspects of trauma care. The Textbook of Acute Trauma Care also focuses on non-clinical issues relevant to trauma such as training and logistics of retrieval and repatriation, aviation considerations in HEMS, legal and forensic evidence considerations and ethical issues dealing with trauma patients. In addition, the book contains chapters from international experts on cognitive and human factors relating to healthcare and suggests strategies for training and minimising errors. This book is an essential resource for all grades of practitioner, from first responders to Consultant/Attending Physician level providers.

The Origins of the Final Solution - Christopher R. Browning 2007-05-01

This groundbreaking work is the most detailed, carefully researched, and comprehensive analysis of the evolution of Nazi policy from the persecution and "ethnic cleansing" of Jews in 1939 to the Final Solution of the Holocaust in 1942.

Trauma Care Pre-Hospital Manual - Ian Greaves 2018-12-07

This new book provides evidence based guidelines for the immediate clinical management of major trauma. It has been written by clinicians with many years of trauma experience, and endorsed as authoritative by Trauma Care (UK). The UK now has highly effective trauma systems. Clinical developments include the introduction of damage control resuscitation, tranexamic acid, blood product resuscitation, novel hybrid resuscitation and an emphasis on the control of major external haemorrhage as part of a new ABCDE approach. Consequently, more individuals with major trauma are surviving than ever before. Optimal pre-hospital care is essential for improved survival rates and reduced morbidity.

Disaster Rules - Rob Russell 2011-03-23

The 80 rules you need to prepare for action in a medical disaster Here are 80 disaster management rules to reflect on, remember and follow in the immediate aftermath of an incident involving mass casualties. Each rule is a single-page long, providing the essential information to inform the most common critical decisions you will have to make in either a civilian or military environment. Written by clinicians with deep clinical and operational experience, these rules are concise evidence-based guidelines for all medical personnel dealing with disasters at the scene or in hospital. Based on the Major Incident Medical Management and Support system widely adopted in the UK, mainland Europe, Australasia and NATO, they are both authoritative and effective.

The Royal Air Force Medical Services - Samuel Cuthbert Rexford-Welch 1955

Rib Fracture Management - Marc de Moya 2018-09-03

In recent years the approach towards rib fractures has evolved. Abandoned in the past, due to inadequate instrumentation and lack of evidence, rib fixation has recently re-emerged as a treatment option for trauma patients. There have been a number of advances over the last 25 years that now allow surgeons to internally fix rib fractures that otherwise may have not had other options. However, as a result there has been a rapid increase in literature and many institutions interested in initiating rib fixation programs. Due to a variety of practitioners involved namely, trauma surgeons, orthopedic surgeons, and thoracic surgeons there has been no comprehensive guide to patient selection, technique, and post-operative care. The purpose of this text is to fill the educational gap for those trauma, orthopedic, and thoracic surgeons interested in learning the cutting edge evidence-based approaches to treatment of rib fractures. This topic has caught the interest of many and has been a recurrent theme at surgical meetings over the last two years. Although there has been ever increasing levels of interest and experience nationally there are many questions which remain. This text will provide not only the theoretical background for improving outcomes in those with rib fractures but also serve as a practical guide to those interested in starting new programs. The text will include tips and tricks that can be used in the OR or at the bedside to improve patient care. Therefore, the focus will be on a comprehensive review but also including tips and tricks from the most experienced surgeons around the country who are performing internal fixation for rib fractures.

Clinical Sport Psychology - Frank L. Gardner 2006

Clinical Sport Psychology will provide readers with an assortment of tools to use in evaluating and working

with athletes. The text addresses a range of athletes' issues in an informed and integrated approach to sport psychology. Rather than focusing on one problem area, one modality of intervention, or one aspect of professional practice, Clinical Sport Psychology blends grounded theory and sound research with effective assessment and intervention practices, presenting empirically informed intervention guidelines specific to various needs of athletes. This text provides the foundation needed for working with athletes experiencing a range of nonclinical, subclinical, and clinical issues. Readers will learn to thoroughly assess athletes, identify and understand their needs, and appropriately intervene with each athlete—unless a referral is necessary to better meet an athlete's individual needs. Clinical Sport Psychology contains the following features: -A thorough explanation of the Mindfulness-Acceptance-Commitment (MAC) approach to enhancement of sport performance -A detailed examination of the empirical support for traditional procedures in sport psychology -A detailed and practical understanding of the Integrative Model of Athletic Performance (IMAP), which integrates clinical and sport science -A firm understanding of the Multilevel Classification System for Sport Psychology (MCS-SP), a model to classify the wide range of athletes' issues - A clear organizational structure from theory through intervention, including special considerations Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The text, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. This cutting-edge text promotes a greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes. Whether helping athletes improve competitive performance, adjust to the changing demands of the athletic environment, or clarify clinical issues, sport psychologists will find valuable insight and direction from this text. Part I integrates relevant knowledge in clinical and sport science, laying the foundation for practice in clinical sport psychology. Part II shows how to assess and classify athletes' issues beyond the traditional assessment approaches in sport psychology. It includes a new and useful approach to the holistic assessment of cases, thereby leading to sound intervention decisions and strategies for case formulation. Part III delves into intervention guidelines for the full range of problems and issues that the practicing clinical sport psychologist will face, and it offers both innovative and empirically informed interventions for a variety of client needs. Part IV examines special considerations in clinical sport psychology, including ethics, professional development, supervision, and future directions for the profession. With 30 years of ongoing practical experience with professional athletes, the authors present an integrated and holistic approach to clinical sport psychology, guiding readers in understanding, effectively assessing, and appropriately intervening with athletic clientele.

Manual of Definitive Surgical Trauma Care, Fifth Edition - Kenneth David Boffard 2019-05-22

Developed for the International Association for Trauma Surgery and Intensive Care (IATSIC), the Manual of Definitive Surgical Trauma Care 5e is ideal for training all surgeons who encounter major surgical trauma on an infrequent basis. This new edition includes both an e-version, and also a microSD card containing over 20 operative videos. The increasing role of non-operative management (NOM) has been recognised, and the Military Module is substantially updated to reflect recent conflict experience. An expanded section highlights trauma management under austere conditions. Written by faculty who teach the DSTC Course, this definitive and well established book focuses on life-saving surgical techniques to use in challenging and unfamiliar incidents of trauma.

Mindful Sport Performance Enhancement - Keith A. Kaufman 2017-08

This book is a comprehensive resource on the history, theory, and practice of mindfulness in sport. The authors present their empirically-supported, six-session mindfulness program adapted for specific athletic populations.

Pre-Hospital Medicine - Ian Greaves 1999-02-26

Immediate care or pre-hospital medicine has become a specialty in its own right as the Faculty of Pre-Hospital Medicine within the Royal College of Surgeons of Edinburgh, and is rapidly gaining much wider acceptance. A substantial literature has built up in this area over the past few years, especially around the fundamental topics of triage and resuscitation. This comprehensive text defines the specialty, with

contributions from all the leading authorities in the field throughout the UK.

Ballistic Trauma - John Breeze 2017-10-18

This revised fourth edition provides a concise guide to the clinical and operational issues surrounding the management of the ballistic casualty. This book utilises the knowledge and experience acquired by those dealing with ballistic trauma on a regular basis to help those who manage these patients less regularly. This book is a valuable reference tool for all medical and paramedical personnel involved in the care of patients with ballistic injury. It is especially relevant for consultants and senior trainees in surgery, anaesthesia, and emergency medicine who are likely to be involved in the management of these unique injuries.

German Military Symbols - United States. Military Intelligence Service 1943

Disaster Medicine - David MacGarty 2014-07-08

Whether switching on the TV, picking up a newspaper or simply logging on to the internet, one is constantly faced with images of natural disasters, conflict and human suffering. Humanity has experienced these problems throughout time and we have evolved methods and mechanisms for alleviating suffering, from trauma care following a traffic accident to international pacts and the Millennium Development Goals. In exploring such diverse cases of aid intervention, *Disaster Medicine: A Case Based Approach* provides interesting, easily accessible content and context for understanding disaster medicine and global health. In each case the reader will be put in the position of the decision maker and as in real life some of the cases will portray success and some will show failure. It is hoped the reader will consider the issues and problems for themselves and perhaps consider things they would choose to do differently. Written by a team of experts with extensive experience in the field and a progressive perspective *Disaster Medicine: A Case Based Approach* is a valuable text for students and professionals of disaster medicine.

Penetrating Trauma - George C. Velmahos 2016-08-31

This book provides clear practical guidance on all aspects of the surgical treatment of penetrating trauma and aims to foster the type of strategic thinking that can save patients' lives. The coverage encompasses prehospital care, penetrating injuries to various body regions and specific organs, orthopedic injuries, peripheral arterial injuries, injuries to special groups of patients, including children and the elderly, military injuries, and a range of other topics. Based on their extensive personal experience, expert authors provide step-by-step instructions on evaluation, surgical techniques, and management of perioperative problems. Tips and tricks and technical pearls are highlighted and each chapter includes a list of the most important points to observe. This second edition of *Penetrating Trauma* has been extensively revised and updated - with inclusion of some entirely new chapters - to take into account the most recent trends in resuscitation, diagnostics, and treatment. It will be an ideal resource for those looking for practical solutions on how to treat injuries surgically.

German Military Abbreviations - 1943

"Perhaps to a greater extent than any other army, the German Armed Forces employ military abbreviations on their maps and charts, on task force tables of organization, on direction and location sign posts in combat zones, on field orders, and, in short, in every case where abbreviations may possibly be used. These abbreviations are often used in connection with military symbols (see *German Military Symbols*, January 1943, Military Intelligence Service). A thorough knowledge of both abbreviations and symbols is therefore essential to military personnel engaged in the interpretation of captured documents."--Page 1.

Early Care of the Seriously Wounded Man - Henry Knowles Beecher 2012-05-05

Acceptance and Commitment Therapy, Second Edition - Steven C. Hayes 2016-08-29

Since the original publication of this seminal work, acceptance and commitment therapy (ACT) has come into its own as a widely practiced approach to helping people change. This book provides the definitive statement of ACT--from conceptual and empirical foundations to clinical techniques--written by its originators. ACT is based on the idea that psychological rigidity is a root cause of a wide range of clinical problems. The authors describe effective, innovative ways to cultivate psychological flexibility by detecting and targeting six key processes: defusion, acceptance, attention to the present moment, self-awareness,

values, and committed action. Sample therapeutic exercises and patient-therapist dialogues are integrated throughout. New to This Edition *Reflects tremendous advances in ACT clinical applications, theory building, and research. *Psychological flexibility is now the central organizing focus. *Expanded coverage of mindfulness, the therapeutic relationship, relational learning, and case formulation. *Restructured to be more clinician friendly and accessible; focuses on the moment-by-moment process of therapy.

Combat Casualty Care - Martha K. Lenhart 2012

"This book is designed to deliver combat casualty care information that will facilitate transition from a continental US or civilian practice to the combat care environment. Establishment of the Joint Theater Trauma System and the Joint Theater Trauma Registry, coupled with the efforts of the authors, has resulted in the creation of the most comprehensive, evidence-based depiction of the latest advances in combat casualty care. Lessons learned in Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) have been fortified with evidence-based recommendations to improve casualty care. The educational curriculum was designed overall to address the leading causes of preventable death and disability in OEF and OIF. Specifically, the generalist combat casualty care provider is presented requisite information for optimal care of US combat casualties in the first 72 to 96 hours after injury. The specialist provider is afforded similar information, supplemented by lessons learned for definitive care of host nation patients."--

Korean - Jaehoon Yeon 2019-06-25

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of *Korean: A Comprehensive Grammar* makes it an essential reference source on the Korean language.

Major Incident Medical Management and Support - Advanced Life Support Group (ALSG) 2019-01-04

The new edition of *Major Incident Medical Management and Support* is a vital component in the blended learning course from Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the preparation, management and support elements of dealing with casualties in a major incident. Split into five sections, each focuses on the elements requisite in preparing for, and responding, to a major incident. The first section discusses the epidemiology and incidences of major incidents and the structured approach to the hospital response. The second section contains the preparation required in planning for major incidents, including equipment and training. The third section covers the management of a major incident, concentrating on the clinical, nursing and management hierarchies. The fourth includes the various stages of support in a major incident, including declaring an incident and activating the plan, the reception, triage, definitive care and recovery phases of an incident. The final section focuses on special incidents which require additional consideration, including those involving hazardous chemicals, burns and children. Written in collaboration with the National Emergency Planning, *Major Incident Medical Management and Support* is an invaluable reference in the emergency department and beyond for staff needing to prepare for the rare, but inevitable, hospital major incidence response.

Manual of Definitive Surgical Trauma Care 3E - Kenneth D Boffard 2011-08-26

Manual of Definitive Surgical Trauma Care is an essential manual for all trainee and qualified surgeons. It covers every aspect of surgical trauma care. Provides clear access to all necessary information, from theory of injury through to individual organ system injury and resources such as injury scoring Provides clear surgical guidance on how to deal with major trauma Updated to incorporate all recent developments including massive transfusion and current surgical techniques of exposure and repair Contains hints, tips and tricks, while highlighting the pitfalls that can occur when dealing with major trauma A truly global perspective based on the IATSIC approved DSTC course, *Manual of Definitive Surgical Trauma Care* will give you the confidence to focus on life-saving surgical techniques when faced with challenging and unfamiliar incidents of trauma. Written by the faculty who teach the DSTC Course, developed for the

International Association for Trauma Surgery and Intensive Care (IATSIC), it is ideal for all surgeons who deal with major surgical trauma on an infrequent basis.

Pre-Hospital Anesthesia Handbook - Tim Lowes 2015-12-11

This second edition handbook details new and improved procedures, current drugs and updated algorithms used by the crews of the Great North Air Ambulance who have been providing this life saving intervention since 2004. It will be of interest to pre-hospital care doctors and trainees, especially those studying for the GNAAS course. Pre-Hospital Anaesthesia is one of the most demanding interventions that can be made in the field. The exact incidence of failed intubation is difficult to quantify, but it is clear that it is higher than in hospital. Equally it is certain that anyone undertaking it should have clear instruction in the technique and a thorough understanding of all it entails.

Research Methods in Sports Coaching - Lee Nelson 2014-03-26

Research Methods in Sports Coaching is a key resource for any student, researcher or practitioner wishing to undertake research into sports coaching. It takes the reader through each phase of the research process, from identifying valuable research questions, to data collection and analyses, to the presentation and dissemination of research findings. It is the only book to focus on the particular challenges and techniques of sports coaching research, with each chapter including examples, cases and scenarios from the real world of sports coaching. The book introduces and explores important philosophical, theoretical and practical considerations in conducting coaching research, including contextual discussions about why it's important to do sports coaching research, how to judge the quality of coaching research, and how sports coaching research might meet the needs of coaching practitioners. Written by a team of leading international scholars and researchers from the UK, US, Canada and Australia, and bridging the gap between theory and practice, this book is an essential course text for any research methods course taken as part of a degree programme in sports coaching or coach education.

Trauma Anesthesia - Charles E. Smith 2015-04-09

Trauma patients present a unique challenge to anesthesiologists, since they require resource-intensive care, often complicated by pre-existing medical conditions. This fully revised new edition focuses on a broad spectrum of traumatic injuries and the procedures anesthesiologists perform to care for trauma patients perioperatively, surgically, and post-operatively. Special emphasis is given to assessment and treatment of co-existing disease, including surgical management of trauma patients with head, spine, orthopaedic, cardiac, and burn injuries. Topics such as training for trauma (including use of simulation) and hypothermia in trauma are also covered. Six brand new chapters address pre-hospital and ED trauma management, imaging in trauma, surgical issues in head trauma and in abdominal trauma, anesthesia for oral and maxillofacial trauma, and prevention of injuries. The text is enhanced with numerous tables and 300 illustrations showcasing techniques of airway management, shock resuscitation, echocardiography and use of ultrasound for the performance of regional anesthesia in trauma.

The Proceedings of the International Workshop on Mediterranean Cartilaginous Fish with Emphasis on Southern and Eastern Mediterranean - Nuri Basusta 2006

Honeyball and Bowers' Textbook on Employment Law - Simon Honeyball 2016-04-28

Succinct in its treatment of the fundamentals, and interwoven with contextual explanation and analytical consideration of the key debates, Honeyball and Bowers' Textbook on Employment Law continues to provide readers with an accessible account of the subject. Including chapter introductions and new end-of-chapter summaries, students of employment law are guided through the intricacies, while further reading suggestions assist with independent research and essay preparation. The critical elements of individual and collective employment law are considered along with treatment of the relationship between UK and EU law, to give readers a wider view of the issues.
