The Stainless Steel Carrot Sylvia Wilkinson 2012-09-15 In 1970, Sylvia Wilkinson was a writer in the category known as 'young Southern Woman Novelist'. While her novels and teaching paid the bills she had a passion for motorsports that led her to write The Stainless Steel Carrot: The Auto Racing Odyssey. The book profiled young up-and-coming road racer John Morton as he raced the BRE Datsun 510 in the 1971 and 1972 SCCA Trans-Am 2.5 Challenge. John won the championships and continued on a road-racing career that saw dozens of championship level victories around the country and abroad. The book, well regarded among both racers and general audience readers, has been out of print since 1973. Original copies often sell for over \$100 online and at collectors events. Now, thanks to years of requests from fans, and Sylvia s interest in animals, the book is republished with additional material. -- Amazon.com.

Japanese Investment and British Trade Unionism Hitoshi Suzuki 2021-12-08 This book revisits the long contested negotiation between the Thatcher administration and Nissan for the latter's first green-field plant in Europe. From the very beginning, the plant took Britain’s EC/EU membership and tariff-free access to the single market as a token. A considerable amount of aid including component supplies was provided to attract Japanese investment and to prevent its transfer to the continent. The successful launch of Sunderland highlighted improved Anglo-Japanese relations and put an end to the Japan-EC/EU trade conflict. But the price was paid by Nissan's slump and fall, and by trade unions in both countries failing to keep counterchecks on management. Brexit and the fall of Carlos Ghosn were a double blow to Anglo-Japanese relations which are in a state of drift and need redefinition.

Collision Course Hans Greimel 2021-06-22 In Japan it’s called the “Ghosn Shock”—the stunning arrest of Carlos Ghosn, the jet-setting CEO who saved Nissan and made it part of a global automotive empire. Even more shocking was his daring escape from Japan, packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center, subsisting on rice gruel. This is the saga of what led to the Ghosn Shock and what was left in its wake. Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business, but the alliance's shiny image fronted an unsteady, tense operation. Culture clashes, infighting among executives and engineers, dueling corporate traditions, and government maneuvering constantly threatened the venture. Journalists Hans Greimel and William Sposato have followed the story up close, with access to key players, including Ghosn himself. Veteran Tokyo-based reporters, they have witnessed the end of Japan's bubble economy and attempts at opening Japan Inc. to the world. They’ve seen the fraying of keiretsu, Japan’s traditional skein of business relationships, and covered numerous corporate scandals, of which the Ghosn Shock and Ghosn’s subsequent escape stand above all. Expertly reported, Collision Course explores the complex suspicions around what and who was really responsible for Ghosn’s ouster and why one of the top executives in the world would risk everything to escape the country. It explains how economics, history, national interests, cultural politics, and hubris collided, crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan. This gripping, unforgettable narrative, full of fascinating characters, serves as part cautionary tale, part object lesson, and part forewarning of the increasing complexity of doing global business in a nationalistic world.
