No matter what reasons are cited--the characters, the actors, the plots, the music--television shows that were beloved by audiences in their time remain fondly remembered. This study covers the classic period of popular television shows from the 1960s through the 1990s, focusing on how regular viewers interacted with television shows on a personal level. Bridging popular and scholarly approaches, this book discovers what America actually watched and why through documents, footage, visits to filming locations, newspapers, and magazine articles from the shows' eras. **Spectatorship** Roxanne Samer 2017-10-25 Media platforms continually evolve, but the issues surrounding media representations of gender and sexuality have persisted across decades. Spectator: The University of Southern California Journal of Film and Television Criticism has published groundbreaking articles on gender and sexuality, including some that have become canonical in film studies, since the journal's founding in 1982. This anthology collects seventeen key articles that will enable readers to revisit foundational concerns about gender in media and discover models of analysis that can be applied to the changing media world today. Spectatorship begins with articles that consider issues of spectatorship in film and television content and audience reception, noting how media studies has expanded as a field and demonstrating how theories of gender and sexuality have adapted to new media platforms. Subsequent articles show how new theories emerged from that initial scholarship, helping to develop the fields of fandom, transmedia, and queer theory. The most recent work in this volume is particularly timely, as the distinctions between media producers and media spectators grow more fluid and as the transformation of media structures and platforms prompts new understandings of gender, sexuality, and identification. Connecting contemporary approaches to media with critical conversations of the past, Spectatorship thus offers important points of historical and critical departure for discussion in both the classroom and the field.

**The Arrows Cookbook** Clark Frasier 2010-06-15 Part how-to-garden primer, The Arrows Cookbook combines more than 150 delicious recipes with time-tested techniques for growing herbs, vegetables, and edible flowers in a book that reconnects us to the land and the seasons. Cooking food from the backyard garden or farmers' market -- or even using herbs grown in pots in a sunny window -- goes beyond a passion for freshness. On an elemental level, the process reawakens the cook to a cycle of nature that our ancestors understood intuitively but that, for most of us, has been lost in the modern world. When chefs Clark Frasier and Mark Gaier left northern California to open their dream restaurant in southern Maine, they had no intention of becoming culinary pioneers. But in 1988 in Ogunquit, Maine, finding enough fresh vegetables and herbs to power a sophisticated restaurant was indeed a challenge. So, like all can-do Americans, they did something. A ragged field of witchgrass behind the restaurant was turned into a garden where they learned to coax a nine-month growing season out of the chilly earth. They built raised beds, saved seeds, researched heirlooms, consulted experts, and started seedlings. Today, that acre of Maine yields 270 varieties of vegetables, herbs, fruits, and edible flowers that provide 90 percent of the produce served at Arrows. Born of great necessity, the garden is the soul of this destination restaurant. In The Arrows Cookbook, Frasier and Gaier tell us how they do it, charting the timeless journey from seed to supper. Recipes celebrate each season -- Asparagus with Mizuna and Blood Orange Vinaigrette and English Pea Soup in spring; Grilled Antipasto Platter and Rib-Eye Steak with Herbs and Caramelized Onions on a summer evening; Napa Cabbage and Apple Cole Slaw and Roast Pork Loin with Rosemary and Garlic for fall; and Escarole and White Bean Soup and Winter Greens with Pink Grapefruit and Red Onion for the chilly, short days of winter. They also offer new takes on such New England classics as Boiled Dinner, Our Way to Steaming Lobster -- Southeast Asian Style, as well as a glorious Thanksgiving feast complete with Roast Turkey with Gravy. The book is full of clear advice and instructions that will make you elegantly self-sufficient in both kitchen and garden: how to smoke a trout, preserve herbs, use raised beds to extend the growing season, make your own prosciutto, start seeds indoors, roast salmon on a plank, maximize garden space, freeze berries, select edible flowers, grow heirloom tomatoes, pickle hot peppers, find local farmers and fisherman for fresh meats and seafood, and more.
